Please read the following before continuing:

Due to Bosch's central directives, it is mandatory to separate test data from production data. Therefore, we have to establish two EDI connections to you. Please fill in the parameters for your test and productive environments below. It is mandatory to have a working test connection first before continuing with the productive one.

If you do not have a separated test environment, we will also configure your productive environment on our test system.

If this is the case, please check this box:

This way you do not have to provide your productive parameters twice.

① Our preferred EDI protocols are **OFTP2** and **AS2**.

① We want to ensure that you stay informed about important updates regarding our services. We will be sending you emails that include information about certificate changes, security updates and other activities.

Please note: These emails will come from **edi-info@mailing.bosch.com**

To ensure you receive our emails, please add this address to your safe sender list. This will help prevent our messages from being marked as spam.
